Project Name: Medical Inventory Management

Problem Statement:

Hospitals and medical suppliers face challenges in efficiently managing their medical inventory. Manual tracking often leads to stockouts, overstocking, and expired products being used, which can negatively impact patient care and operational costs. The goal of this project is to create an automated Medical Inventory Management System using Salesforce to streamline supplier management, purchase orders, stock tracking, and expiry monitoring.

Objectives:

Automate the process of tracking medical supplies.Ensure expiry date monitoring and notifications.Generate accurate reports and dashboards for decision-making.Improve operational efficiency and reduce manual errors.
